**Worldwide EPC contractor for  
the Oil and Gas industry**

# Beender

is a project driven company that is capable of moving its resources worldwide to respond to the needs of Oil and Gas operators.

## Our edge

We co-operate with our clients at a very early stage of their projects so that we can tailor solutions to their needs from basic preliminary parameters.

We help our clients overcome time constraints by providing services ranging from Front End Engineering and Design to Commissioning and start-up.

We have earned the consideration and appreciation of Junior and Major Oil & Gas Companies by our responsiveness and our ability to adapt to specific situations.

## Products

In addition to EPC contracting activities, Beender can Design, Fabricate and Deliver Oil and Gas field equipment:

- Production and Test Separators
- Heaters
- Flares
- Water treatment skids
- Dehydration units
- Gas boots
- Scrubbers
- Production manifolds
- Pig Launchers & receivers
- Metring skids
- Slug Catchers

Every equipment is specifically designed from production parameters.

Beender operates in Western Africa (Congo, Gabon); Northern Africa (Algeria, Tunisia, Libya) and Middle East (Iraq).

**PIPELINES**  
Building pipelines worldwide

**PROCESS FACILITIES**  
Design & worldwide construction of oil & gas processing facilities

**STORAGE TANKS**  
Engineering, fabrication & on site erection of large crude oil storage tanks

**PROCESS PACKAGES**  
Modular process equipment packages for oil & gas facilities

**OFFSHORE**  
Innovative solutions for marginal offshore production

**EPF & SURFACE PRODUCTION TESTING**  
Fast track production solutions

**TECHNICAL MODULES**  
Power, pumping, compression modules and more for oil & gas facilities

**LOGISTICS**  
Deploying resources worldwide in the most remote areas
